Facebook's mission is to give people the power to build community and bring the world closer together. Through our family of apps and services, we’re building a different kind of company that connects billions of people around the world, gives them ways to share what matters most to them, and helps bring people closer together.

Whether we’re creating new products or helping a small business expand its reach, people at Facebook are builders at heart. Our global teams are constantly iterating, solving problems, and working together to empower people around the world to build community and connect in meaningful ways. Together, we can help people build stronger communities — we’re just getting started.

Facebook is seeking a forward thinking experienced individual to join the Data Center Operations Team. The person should enjoy working in a fast-paced environment where adaptability and flexibility is key to their success. This position is full-time and will be based in Prineville, OR. We seek an IT professional with good hands-on technical skills in Networks, Server Hardware and Linux (Ideally in a Data Center environment). Having depth and breadth knowledge of managing servers in a large-scale distributed environment is a core competency of this individual. The candidate should also have managerial experience with deep knowledge and experience in at least one of the following core areas: Networking, Project Management, Tool and Automation, and or Hardware and
