2018 Technology Graduate Programme

American Express is continuing an exciting transformation driven by an energetic team. This diverse and creative organisation has the power to shape our technology and product roadmap. If you have an interest in improving your skills in a tech environment while meeting innovative thinkers and serving our customers across physical and digital spaces, join our transformation team!

Graduates who join our Technology group will be assigned to one of many exciting teams that are developing new virtual Internet-based payment solutions, customer service portals, online merchant services support and integration, credit management tools, and suites of web-based applications for Card Member targeted offers that will span over 20 international markets.

As part of the American Express Technology team you will have the opportunity to work on world-class Card Member experiences on multiple channels. We are looking for Graduates to join our rotational programme, allowing you to choose from a number of potential roles within our agile Scrum teams; such as Software Engineers, Data Architects, Quality Assurance Engineers, Product Owners and hybrid roles across the organisation, giving you the skills and experience to help you accelerate in your career.

What type of work can you expect to do in Technology at American Express?

- Identify exciting opportunities for adopting new technologies to solve existing needs and predict future challenges
- Develop software applications as part of a Scrum team
- Learn technical skills, write code, conduct code reviews and
