work with the world's largest and most complex companies and understand the unique business issues and opportunities our clients face.

Job Description
The Financial Services industry is operating in a challenging environment due to global economic pressure, increasing regulatory demands and capital requirements, and significant operational and technology changes. Our growing Financial Services Advisory team provides strategy, management, technology and risk consulting services to help major financial institutions around the world respond to their most complex business challenges. The Financial Services Advisory practice is composed of three industry sectors: Asset Management, Banking and Capital Markets, and Insurance.

Our Application Technology consultants provide an end to end solution offering including Application Development and Integration, Application Architecture, custom IoT and mobile solutions, User Experience, Quality Management and Testing, Business Process Management and helping clients determine the best applications for their business needs and integrate new and existing applications into their business including Mobility integration. This high performing team works with various types of technologies and software framework such as Java, .Net, iOS, HTML5, ESBs, advises on the software development life-cycle, and helps architect and develop specific applications for clients. Additionally, they assist with integration of new applications and quality management and testing.
